EDUCATION

Aligarh Muslim University, Aligarh <i>Master of Computer Applications</i>	2024 – 2026 <i>CGPA: 7.79 (till 1st sem)</i>
Aligarh Muslim University, Aligarh <i>Bachelor of Science (Computer Application)</i>	2021 – 2024 <i>CGPA: 7.0</i>
AMU Schools, Aligarh <i>High School (87%), Intermediate (70%)</i>	2018 – 2020

EXPERIENCE

AAA2 Innovate Pvt. Ltd., Noida <i>Frontend Developer Intern</i> - Engineered a schema-driven no-code website builder enabling dynamic page rendering and reducing manual layout effort through drag-and-drop component composition. - Designed a node-based page schema to represent UI structure, enabling reusable component composition and hierarchical layout management. - Architected and implemented core editor systems including a canvas rendering engine, inspector panel, layout controls, and component registry. - Built a modular and extensible architecture supporting scalable component addition and real-time visual updates within the editor.	Jan 2026 – Present
The BrandsWay, Aligarh <i>Web Developer Intern</i> - Developed and deployed responsive client websites using HTML, CSS, JavaScript, Bootstrap, and PHP for clients including The PlayPlace International School and Yasir Ali Classes. - Optimized performance and SEO, improving page load speed, mobile responsiveness, and cross-browser compatibility.	June 2025 – Aug 2025
Ilizien Pvt. Ltd. <i>Web Development & Testing Intern</i> - Improved UI responsiveness and accessibility by identifying and resolving frontend issues. - Conducted functional and API testing, ensuring reliability of web features and tracking issues using Jira.	Sept 2024

PROJECTS

AI-Powered Email Reply Generator <i>Spring Boot, Java, JavaScript, Chrome Extension</i> - Engineered a full-stack AI email assistant using Spring Boot and a Chrome Extension to generate contextual replies directly within Gmail. - Designed and implemented REST APIs to handle asynchronous communication between the extension and backend, integrating the Gemini API for real-time response generation. - Developed content scripts and DOM parsing logic to dynamically extract email context from Gmail's interface and inject AI-generated responses into the compose window. - Handled dynamic DOM updates and event-driven rendering within Gmail, ensuring reliable response injection across changing UI states.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript
Frontend: React.js, Bootstrap, Tailwind
Backend: Spring Boot, Rest APIs
Tools: Git, Postman, Jira
Databases: MySQL, Oracle
Core CS: Operating Systems, DBMS, OOP, Computer Networks

POSITION OF RESPONSIBILITY

Web & Tech Lead — Computer Science Society, AMU (2023–2024)
ICECI Coordinator — Organized a 3-day International Conference on Emerging Computational Intelligence
General Secretary — Led organization of a national-level MUN with 250+ participants from 12+ Colleges
